Professional Summary

I am a dedicated web developer with expertise in both front-end and back-end development. Experienced in creating responsive, user-friendly websites with an optimal user experience. Passionate about exploring new technologies and implementing innovative solutions in software development.

As a Computer Science student at **Dian Nuswantoro University (Udinus)**, I am actively involved in the **DOSCOM** (Dinus Open Source Community) organization, where I contribute to open-source projects and enhance my programming and software development skills.

Education

Dian Nuswantoro University (Udinus)

Bachelor's Degree in Computer Science | [Year of Admission – Graduation Year]

- Active member of **DOSCOM**, participating in seminars, workshops, and open-source programming projects.
- Developed various web and mobile applications as part of coursework and community projects.

Work Experience

Freelance Web Developer

Self-Employed | [2023-2024]

- Built and developed various websites using **Laravel, CodeIgniter, and React.js**.
- Integrated payment systems and third-party APIs to enhance application functionality.
- Optimized website performance to improve user experience.

Internship at Diskominfo

Department of Communication and Informatics | [Duration: 1 Month]

- Responsible for **rebranding the official website** to improve usability and modern design.
- Redesigned UI/UX for better accessibility and responsiveness.
- Optimized website performance and security.

Projects

TokoKita e-Commerce (PHP & CodeIgniter 4)

- Developed a responsive e-commerce platform with secure payment features.
- Optimized UI design for better user-friendliness and responsiveness.

NiKaula Cashier System

- – Created a web-based cashier system for efficient sales transaction management.
- – Enabled admins to record sales, manage inventory, and calculate total payments automatically.

PKKP Jateng Application
